

A photograph of a modern building facade featuring large concrete panels and vertical wooden slats. The building has a flat roof and large windows. The foreground shows a pool and some landscaping. The text 'LAMELIO' is centered in the upper half of the image, with 'WALL PANELS' in smaller text below it. The word 'OUTDOOR' is written in large white letters across the middle of the image. The text 'MODERN FACADE PANELS' is at the bottom center.

OUTDOOR COLLECTION

For 5 years, we have been developing the Lamelio brand: creating original collections inspired by the latest trends in architecture and design. The success of our interior panels, together with the trust and satisfaction of our customers, inspired us to open a new chapter in the history of the brand. This is how Lamelio Outdoor was created - a modern facade panel system designed specifically for exterior applications.

BRUNO

COLLECTION

The BRUNO collection is a minimalist form based on a simple, expressive profile. Each slat is separated by a black groove that emphasises the rhythm and depth of the entire composition. The perceptible surface texture adds a natural character and works with the light, creating a subtle visual effect. It is a coherent solution for modern facades where detail and proportion matter.

NATURAL SHADES

The same profile. Four distinct personalities.

cedar

teak

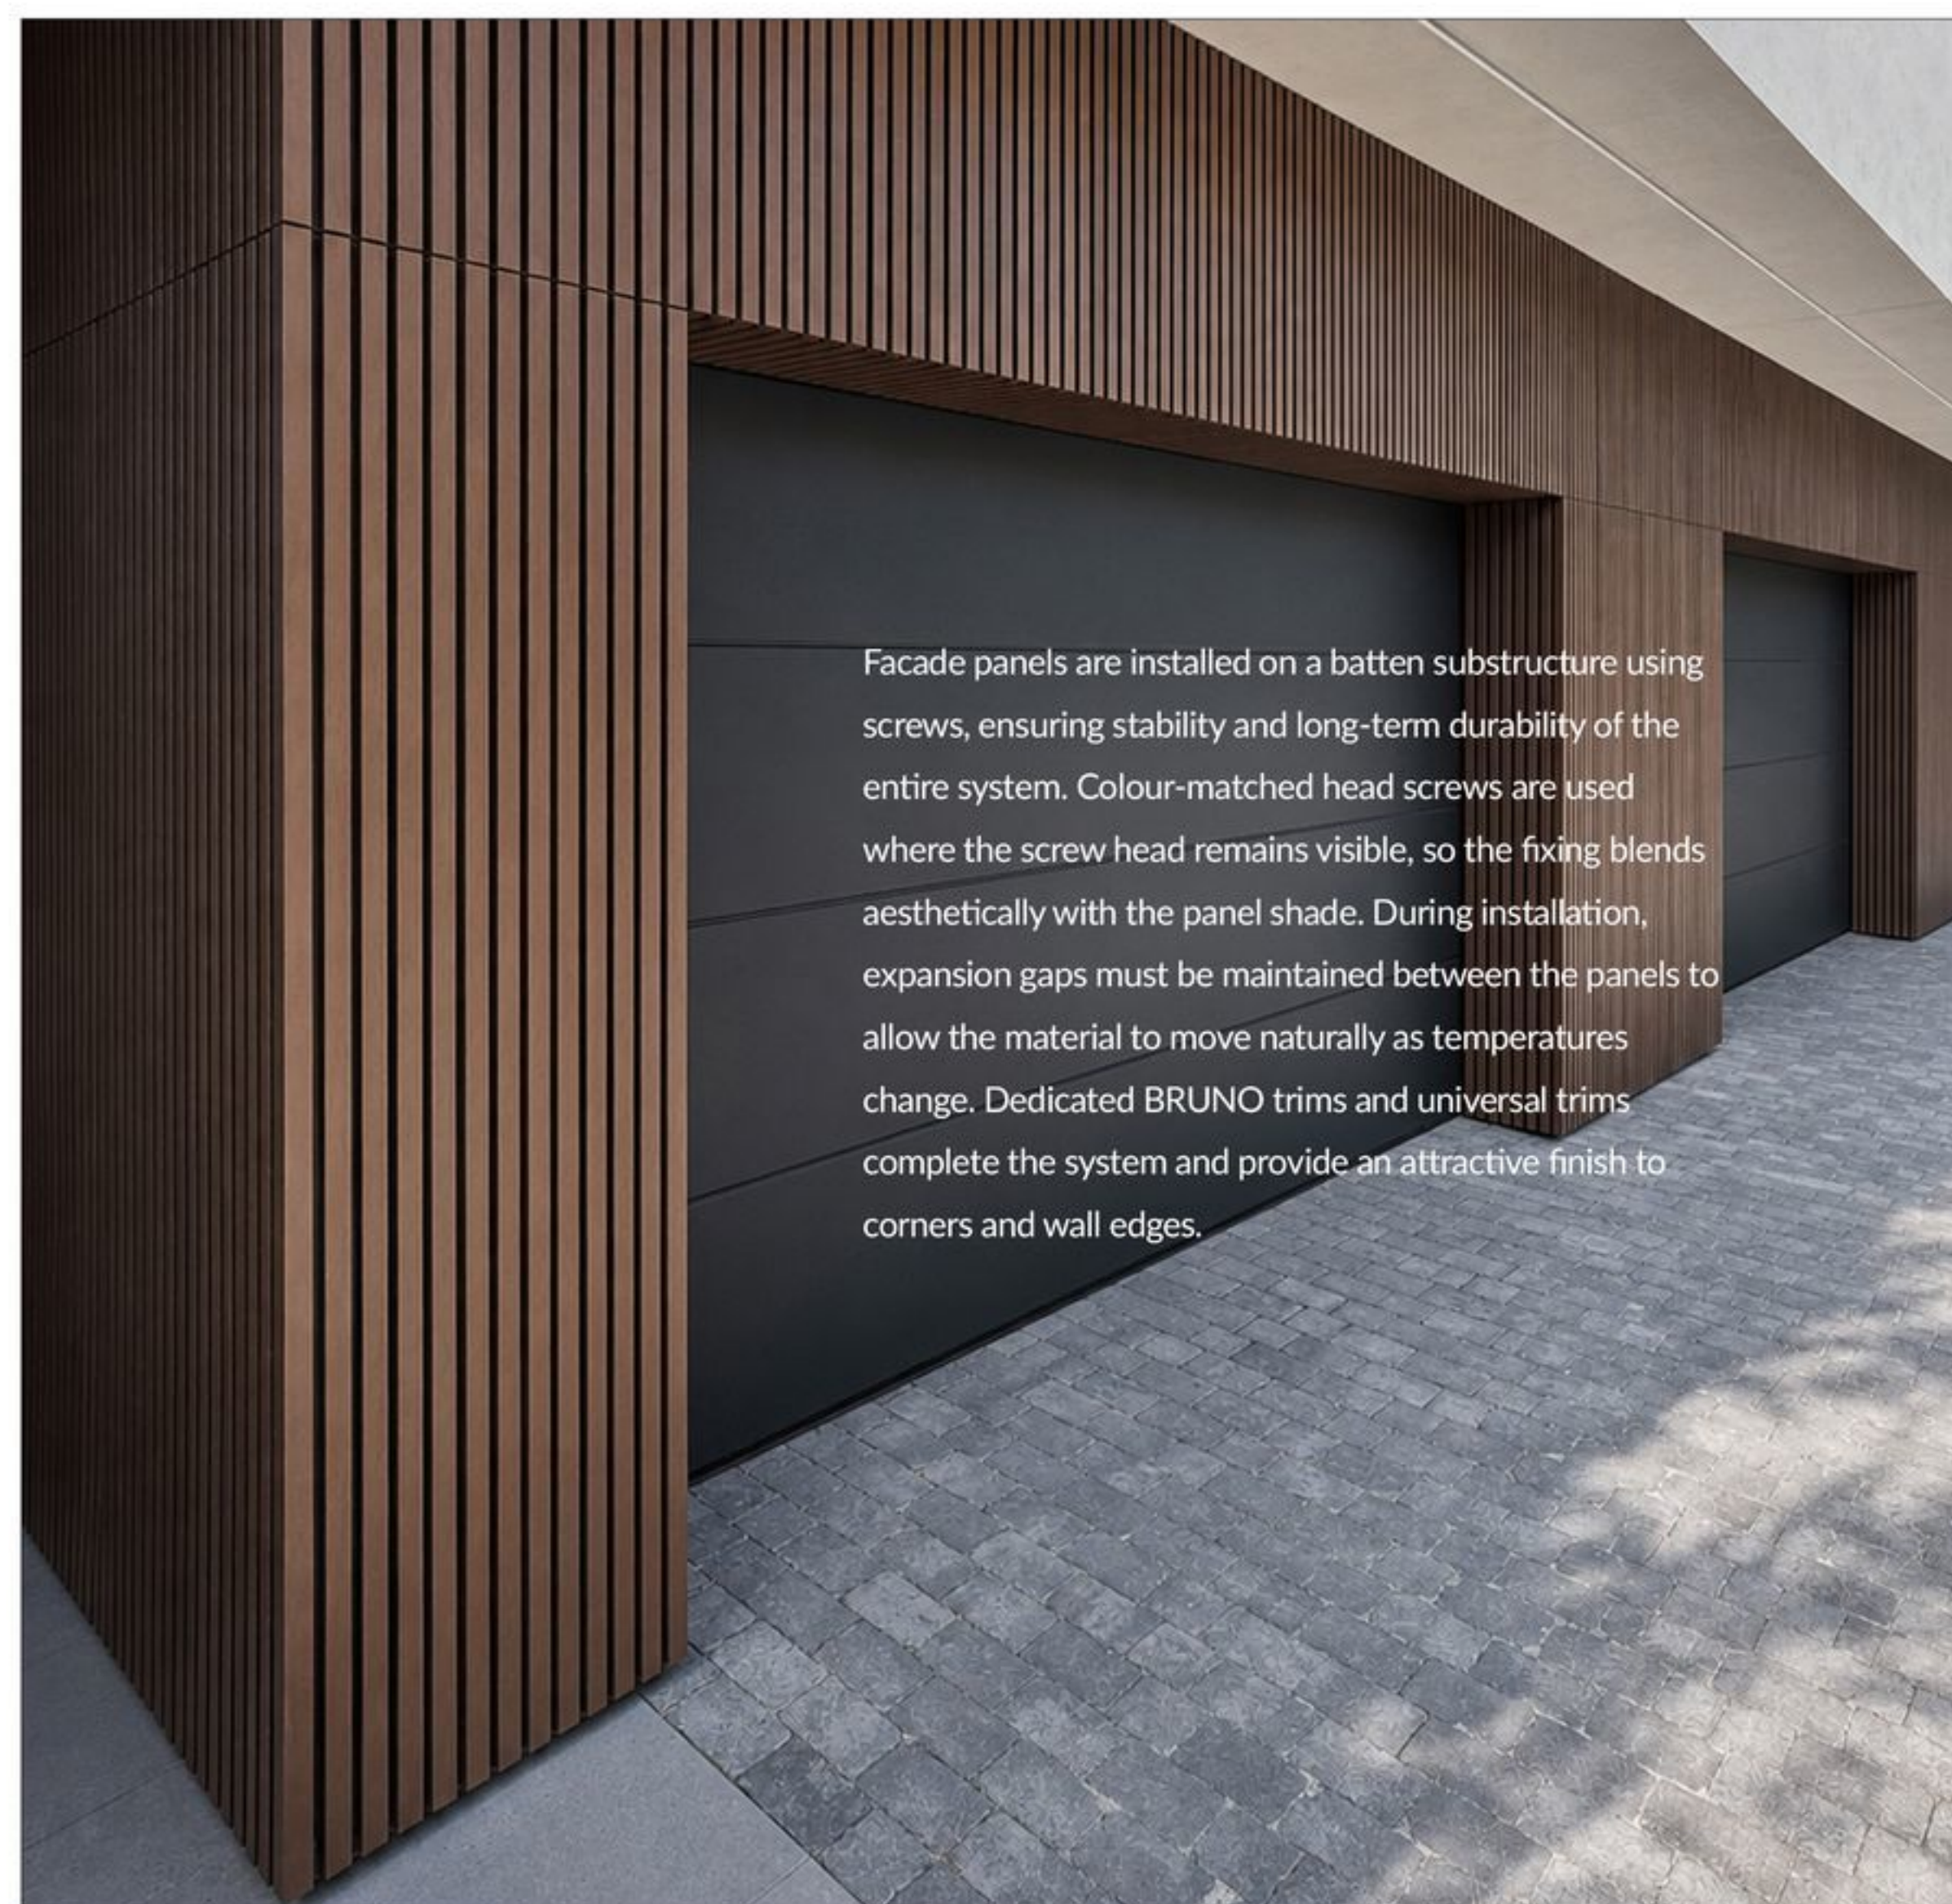

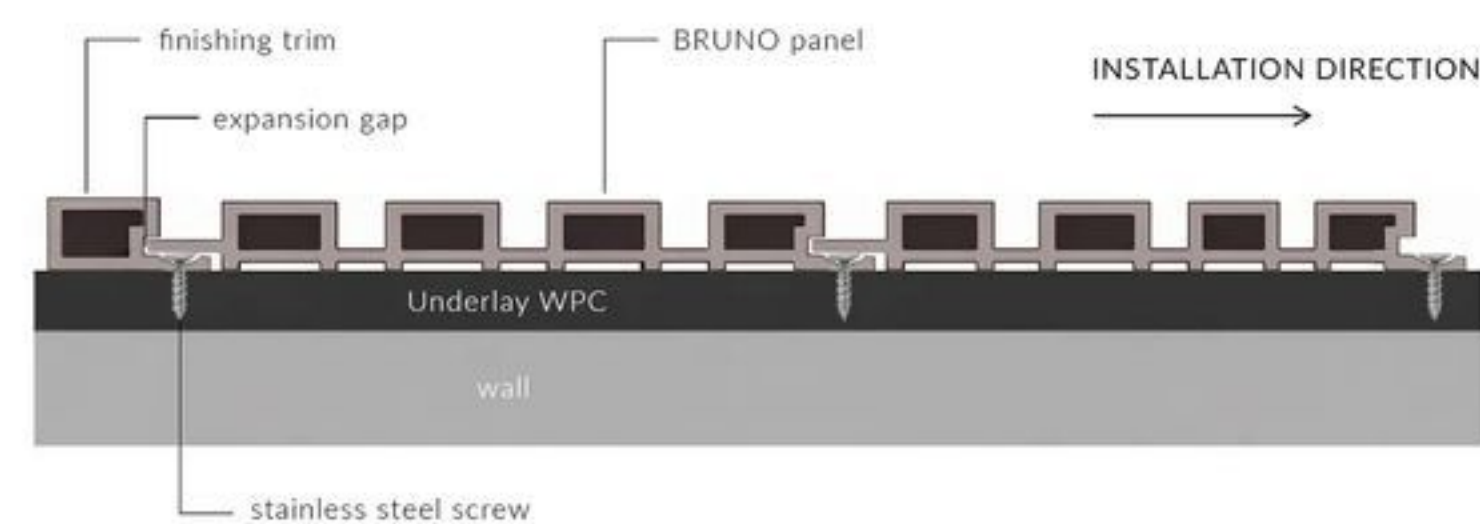

walnut

grey

INSTALLATION OF BRUNO COLLECTION PANELS

Facade panels are installed on a batten substructure using screws, ensuring stability and long-term durability of the entire system. Colour-matched head screws are used where the screw head remains visible, so the fixing blends aesthetically with the panel shade. During installation, expansion gaps must be maintained between the panels to allow the material to move naturally as temperatures change. Dedicated BRUNO trims and universal trims complete the system and provide an attractive finish to corners and wall edges.

SYSTEM COMPONENTS

complementary products for the Bruno collection

CORNER BRUNO

Used where the available space allows a dedicated trim matched to the dimensions of BRUNO collection slats.

available colours:
cedar • teak • walnut • grey

dimensions: 49 x 49 x 2900 mm

CORNER UNIVERSAL

Used when an aesthetic corner finish is required while retaining as much wall coverage as possible.

available colours:
cedar • teak • walnut • grey

dimensions: 53 x 41 x 2900 mm

CONNECTOR BRUNO

Used where the installation direction of BRUNO collection slats needs to be reversed.

available colours:
cedar • teak • walnut • grey

dimensions: 76 x 26 x 2900 mm

TRIM BRUNO

For an aesthetic finish to wall edges and corners, matching the dedicated BRUNO trim.

available colours:
cedar • teak • walnut • grey

dimensions: 49 x 26 x 2900 mm

UNIVERSAL BOARD

A perfect finish for a slat run, especially where there is no space for another slat. Also suitable for window reveals.

available colours:
cedar • teak • walnut • grey

dimensions: 115 x 9 x 2900 mm

PANEL UNDERLAY WPC

A stable supporting structure for facade panels, ensuring ventilation, durability and correct installation of the system.

available colours:
black

dimensions: 53 x 41 x 2900 mm

COLORED STAINLESS STEEL SCREWS

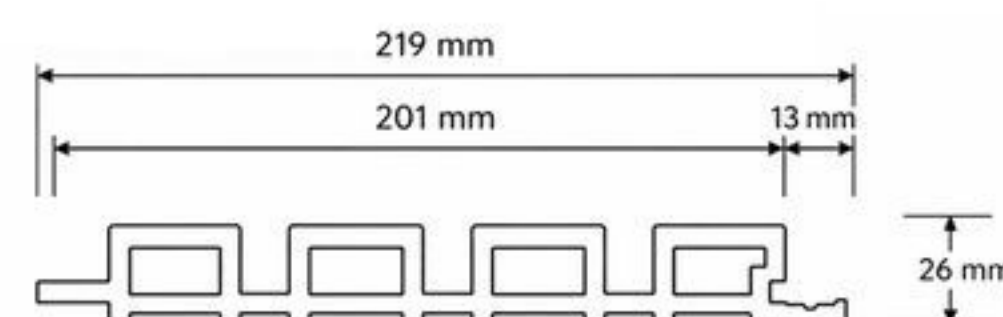

For an aesthetic panel installation, providing durable fixing and matching the selected panel design.

available colours:
cedar • teak • walnut • grey

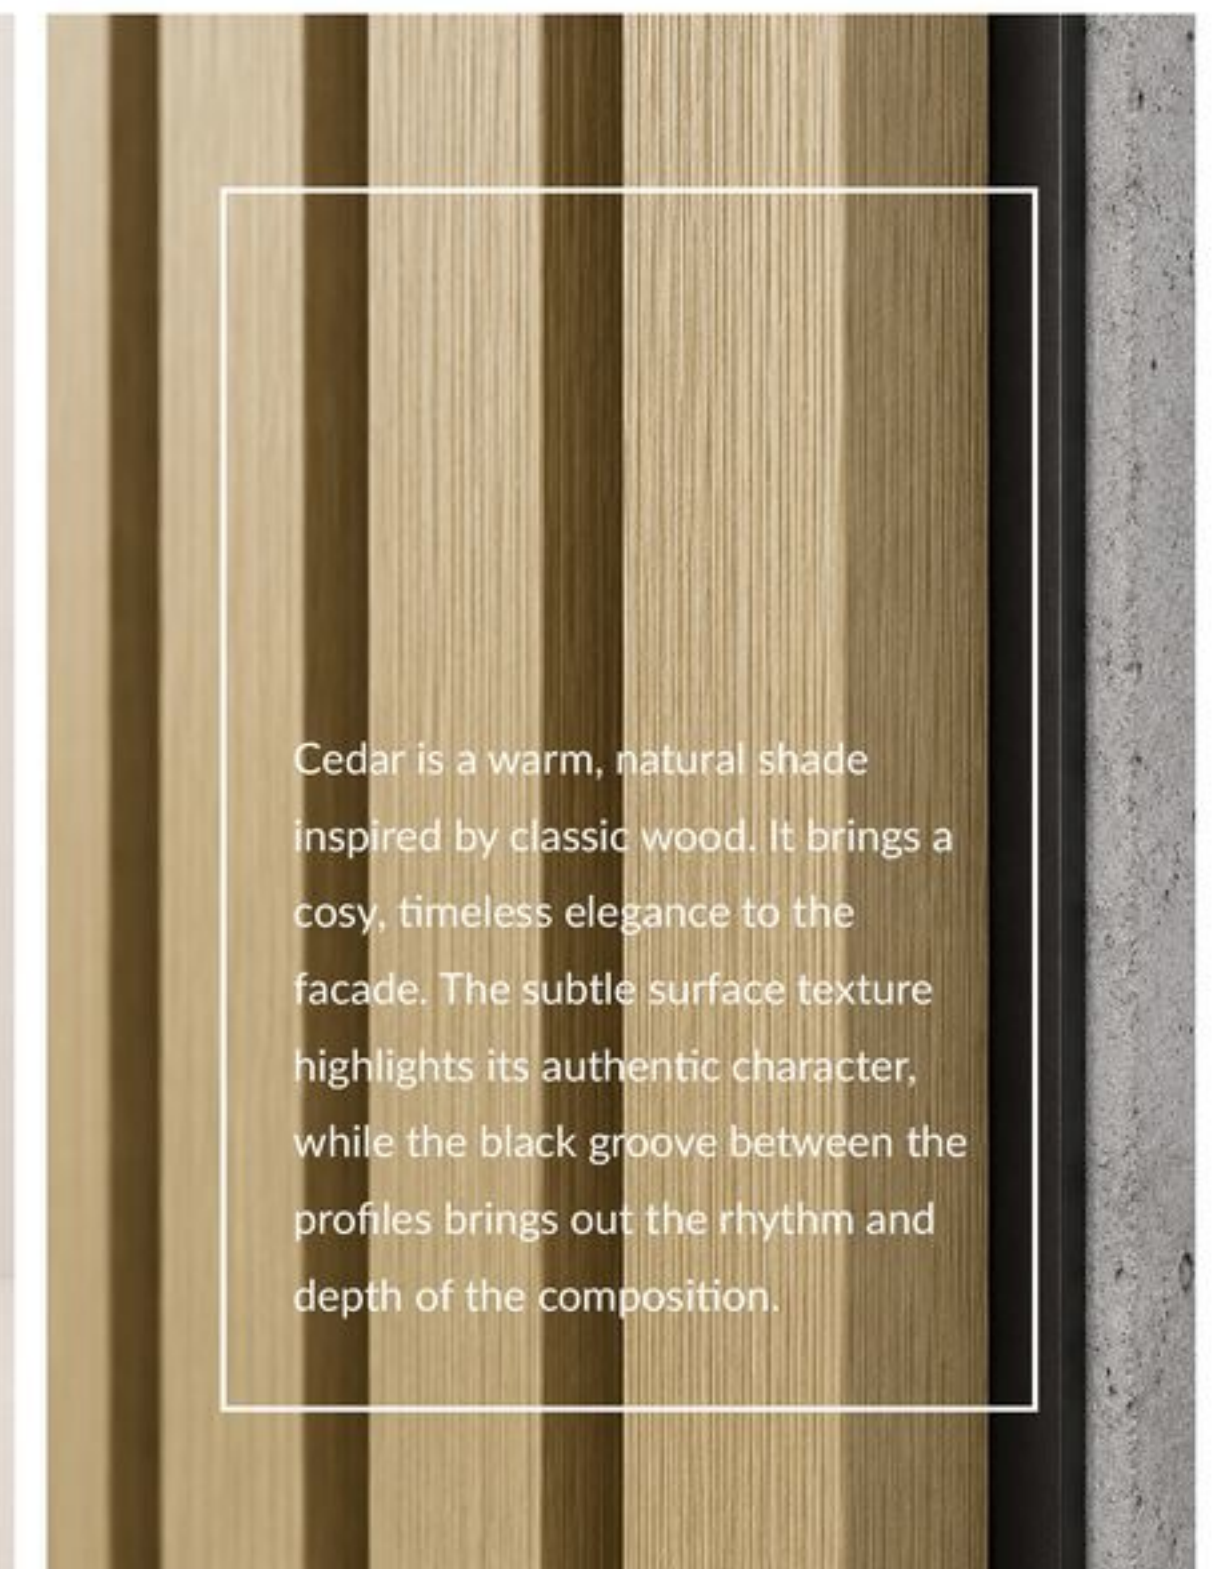

dimensions: Ø 42 x 38 mm

	panel length	2900 mm
	coverage area	0,58 m ²
	weight per m ²	10,95 kg/m ²

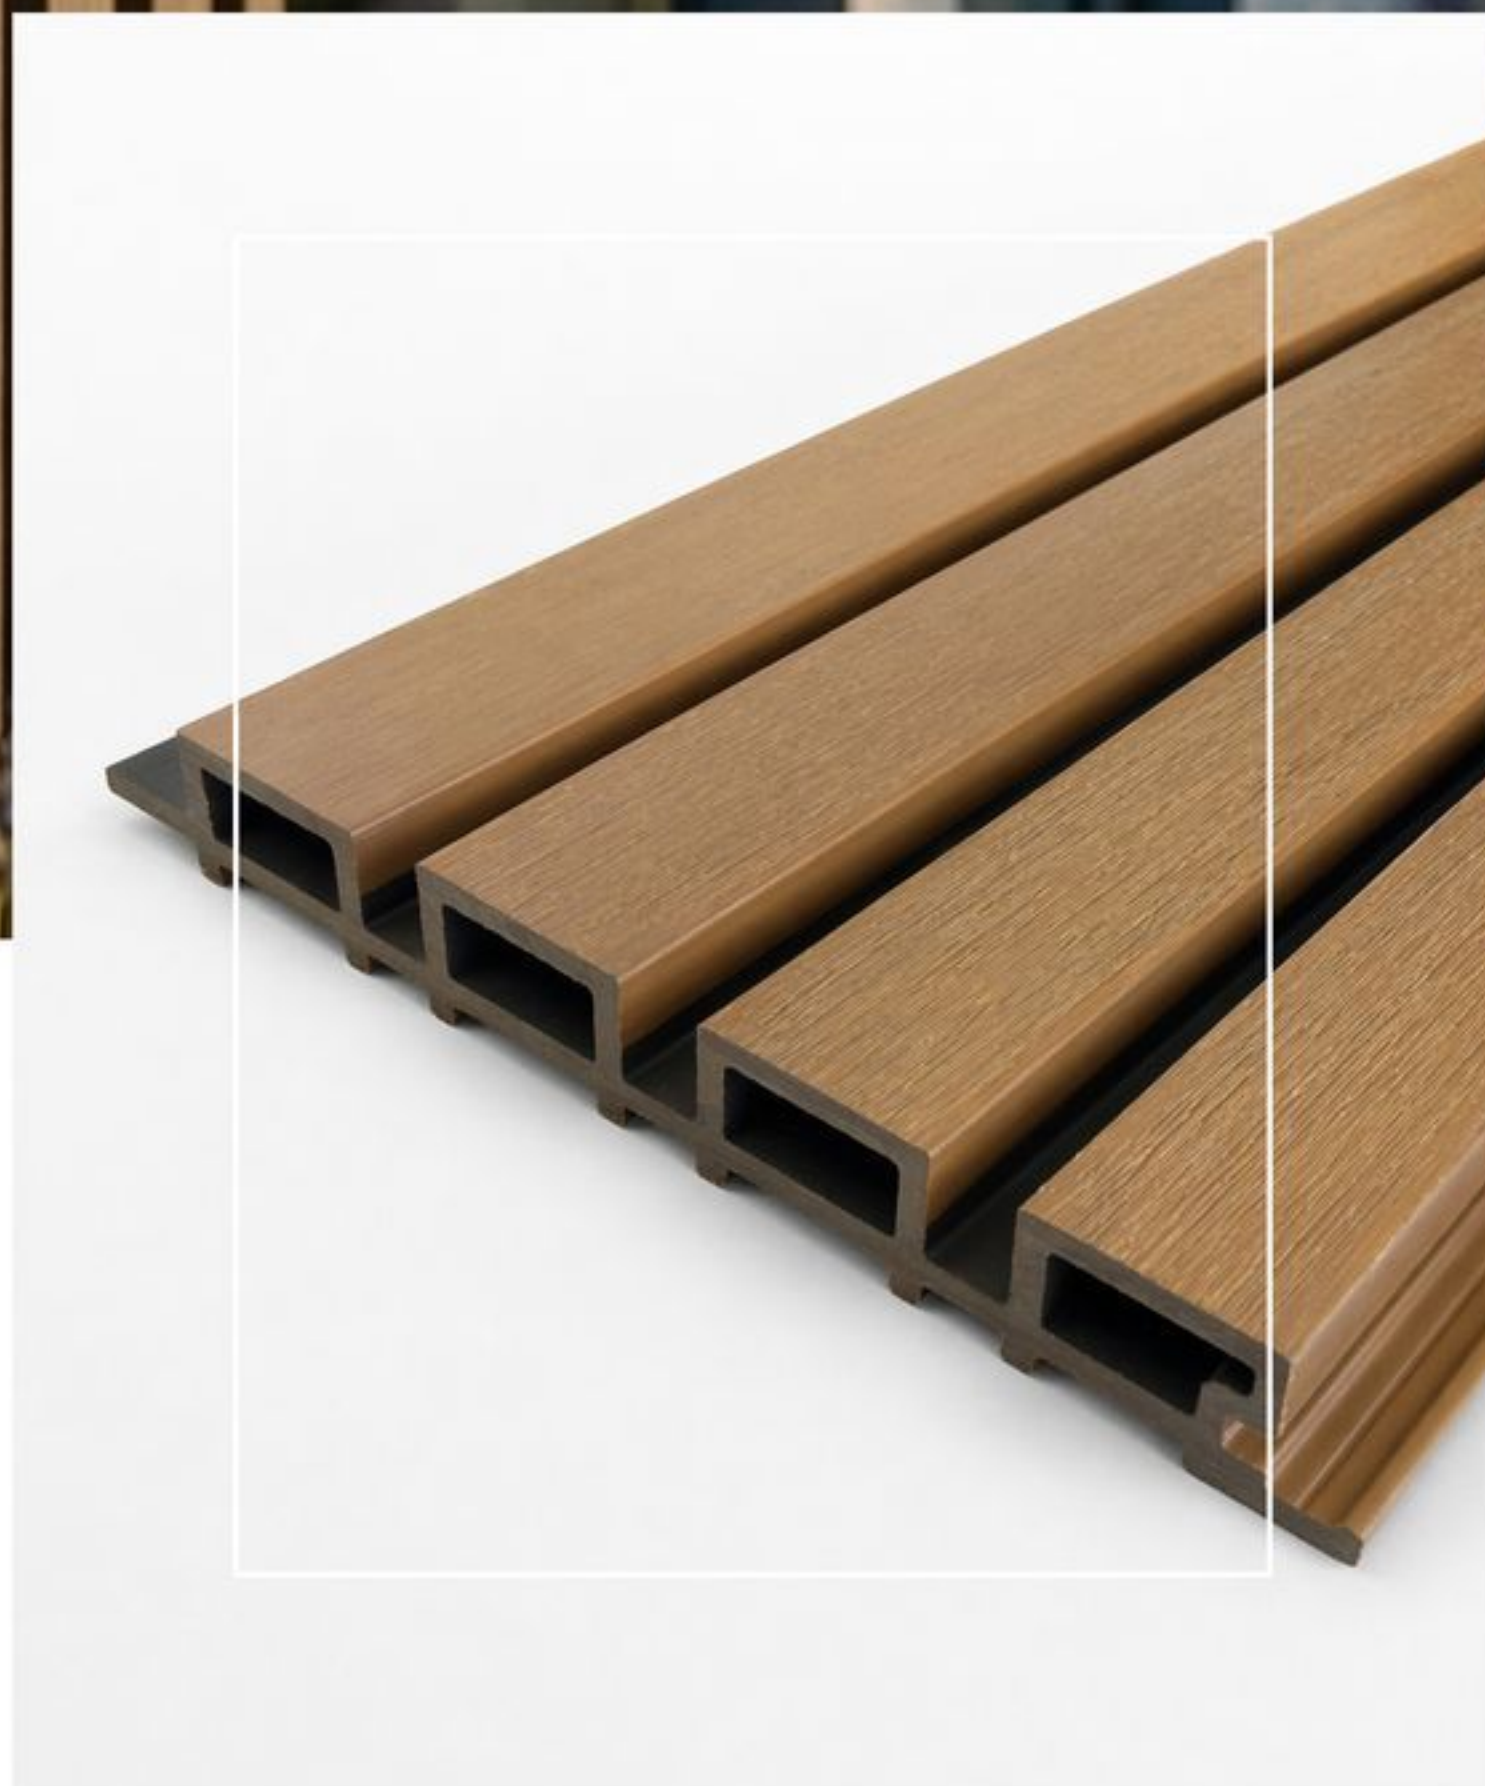

BRUNO
COLLECTION

Bruno Teak is an elegant, warm shade inspired by natural teak wood, combining honey and brown tones. The black groove between the slats emphasises the profile geometry and gives the facade a modern, expressive appearance. The subtle wood texture combined with the regular rhythm of the wide slats creates a premium effect, perfectly suited to both modern architecture and more natural settings.

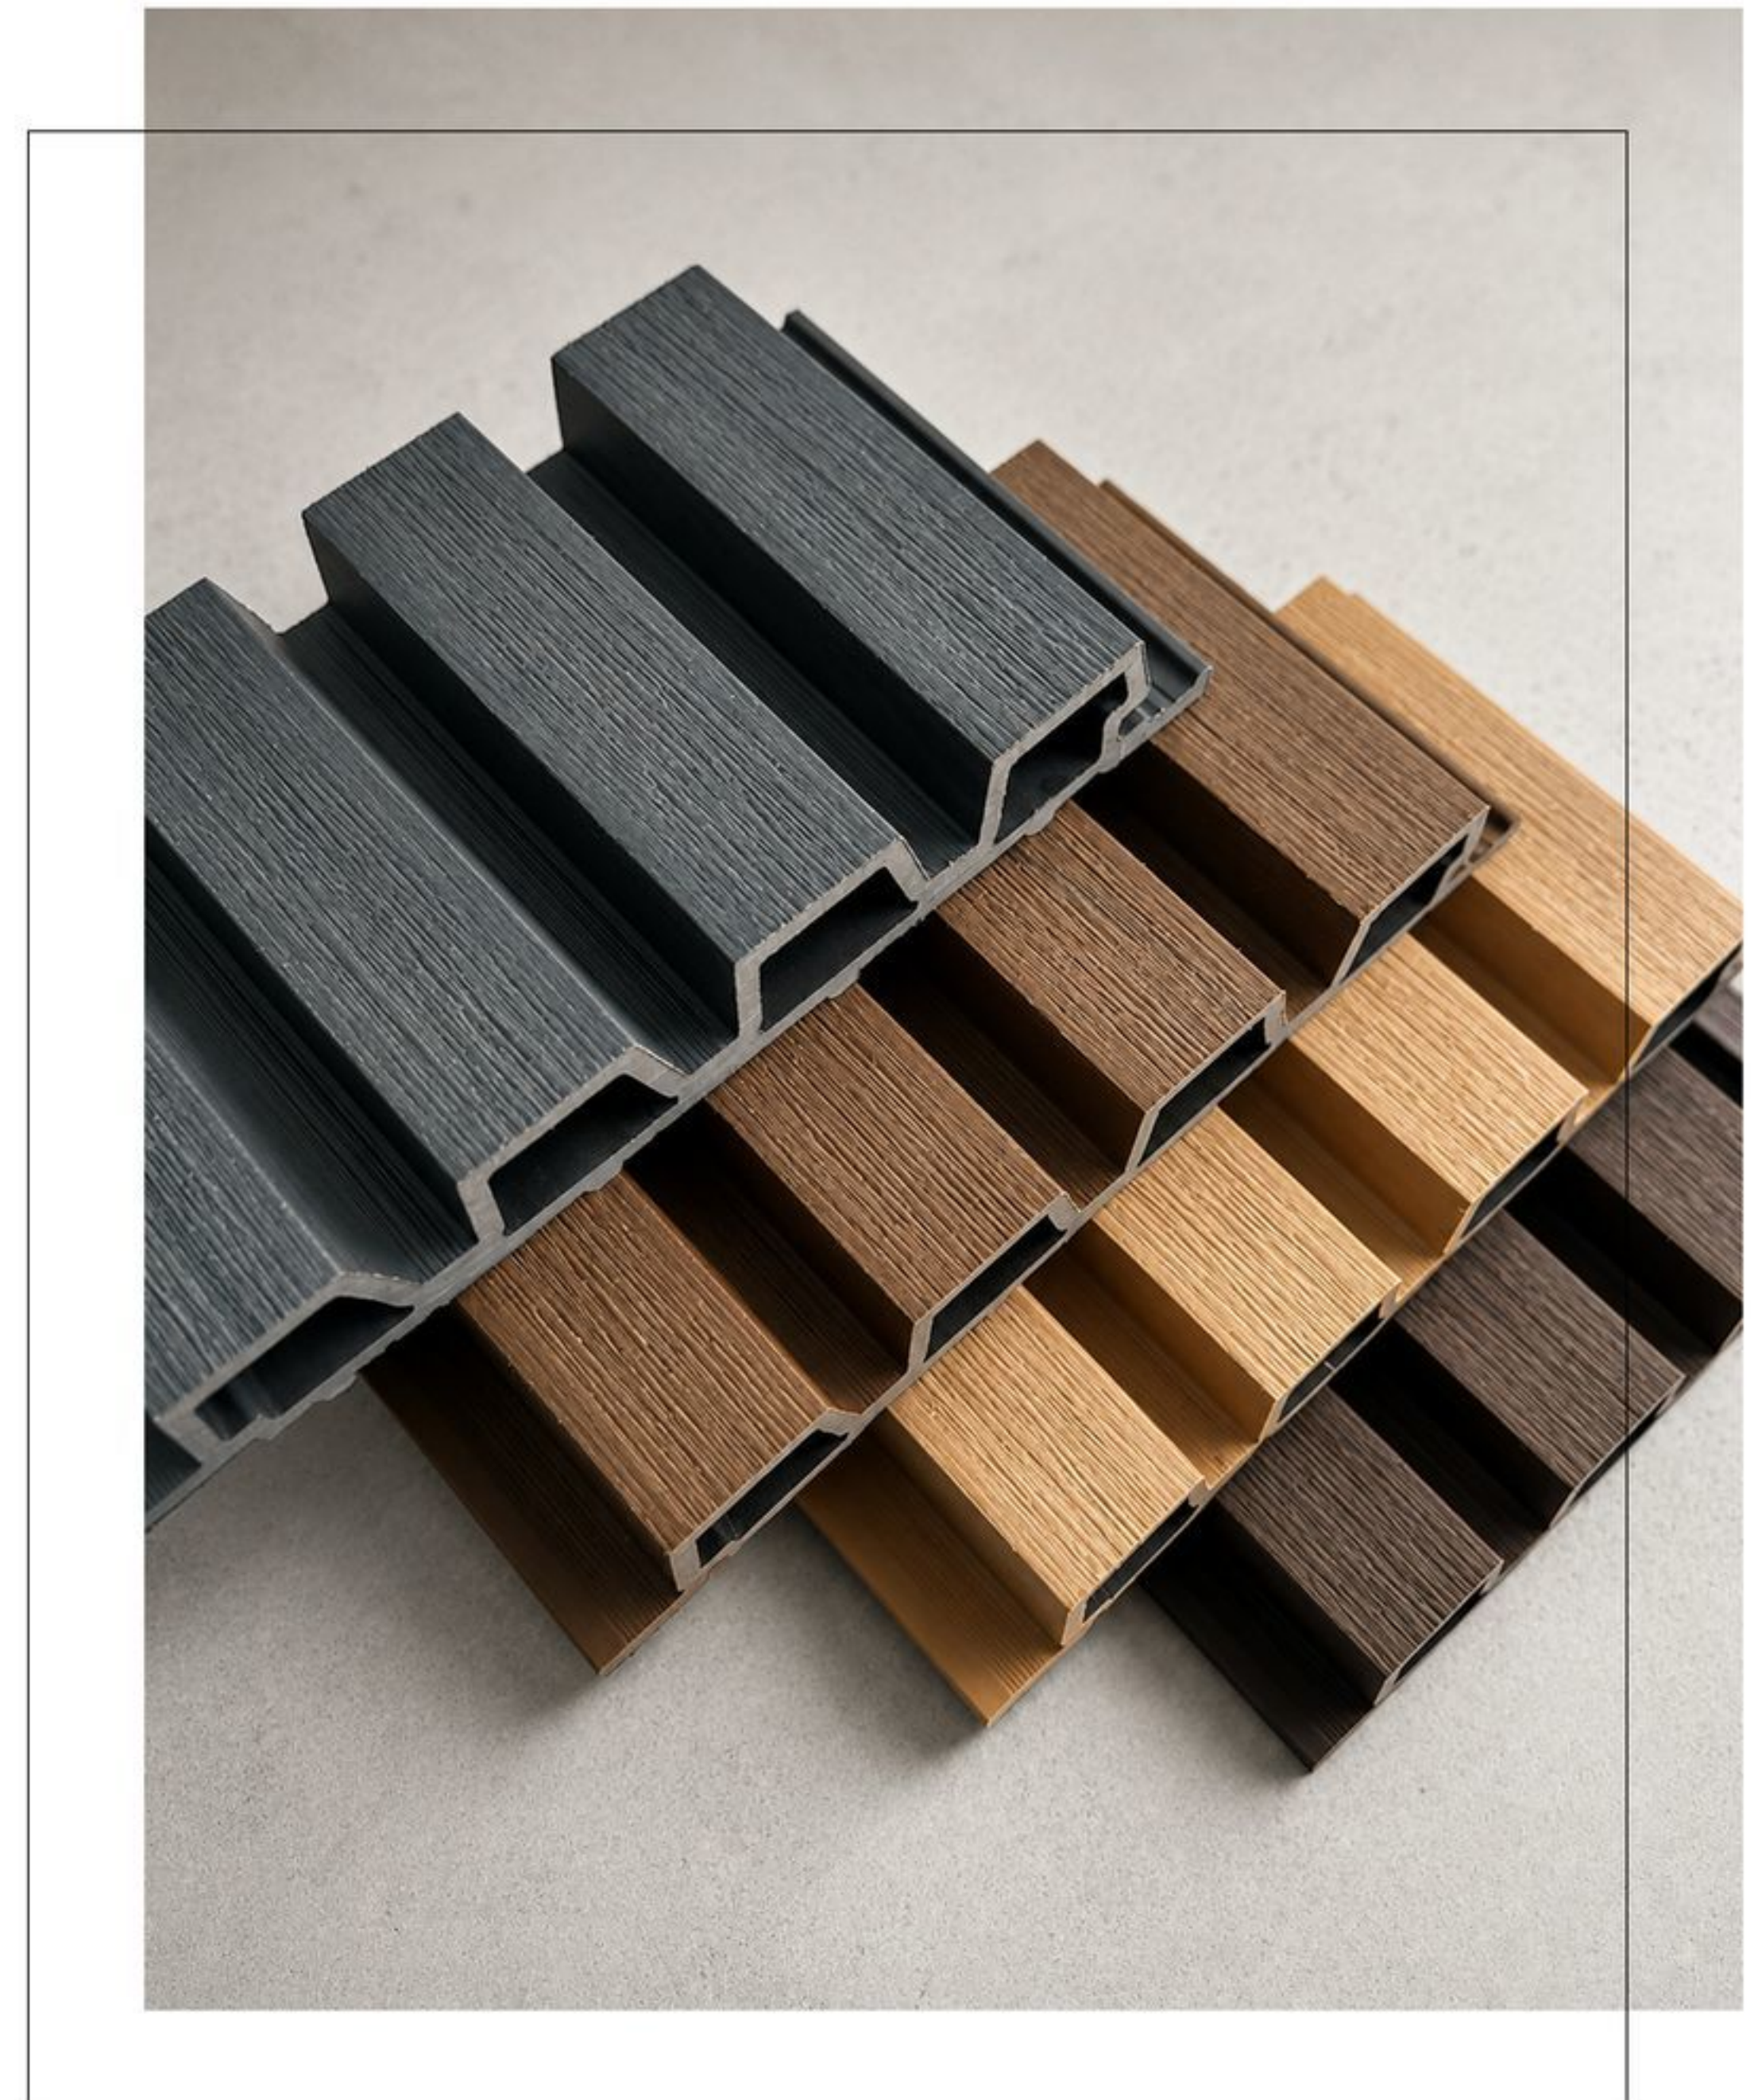

Walnut is a deep shade inspired by natural walnut wood, associated with elegance, warmth and refined beauty. The textured surface emphasises the natural wood grain, while the black groove between the profiles gives the composition a modern, architectural rhythm. This colour fits perfectly into minimalist aesthetics where form and balanced detail count.

LEO COLLECTION

Leo is a collection of modern facade panels with a distinctive trapezoidal cross-section that gives the facade a pronounced architectural rhythm. The subtle texture and warm colour palette inspired by natural wood create an elegant effect without the maintenance required by real wood. Using the same colour and texture on the panel surface keeps the facade exceptionally coherent and natural. The slim profiles visually streamline the building and emphasise its modern character.

COLOURS INSPIRED BY NATURE

Four interpretations of natural wood.

cedar

teak

walnut

grey

SYSTEM COMPONENTS

complementary products for the Leo collection

CORNER LEO

Used where the available space allows a dedicated trim matched to the dimensions of LEO collection slats.

available colours:

PANEL UNDERLAY WPC

A stable supporting structure for facade panels, ensuring ventilation, durability and correct installation of the system

available colours:
black

dimensions: 53 x 41 x 2900 mm

COLORLED STAINLESS STEEL SCREWS

For an aesthetic panel installation, providing durable fixing and matching the selected panel design

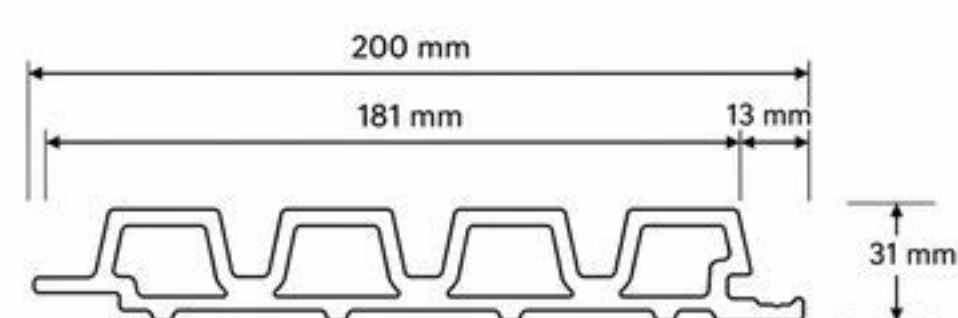

available colours:
cedar • teak • walnut • grey

dimensions: Ø 42 x 38 mm

INSTALLATION OF LEO COLLECTION PANELS

	panel length	2900 mm
	coverage area	0,524 m ²
	weight per m ²	14,9 kg/m ²

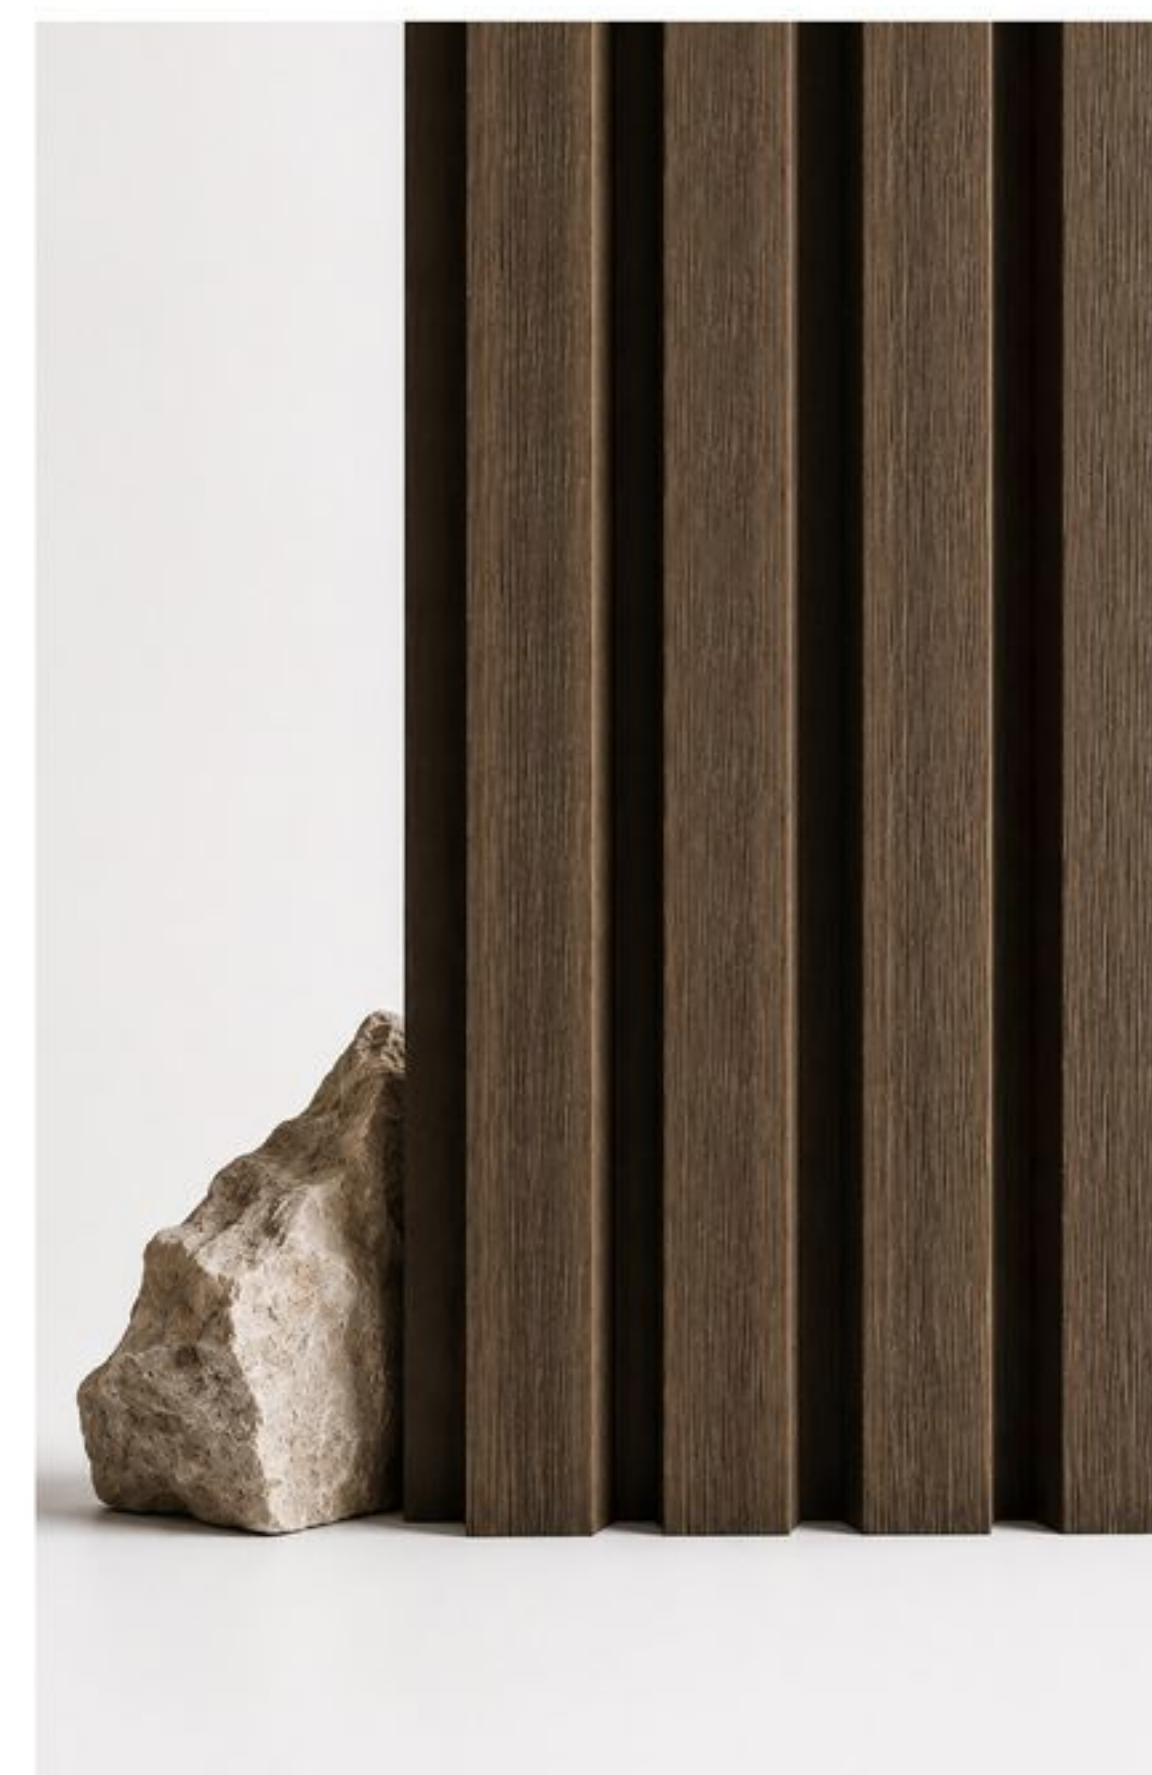

Leo Cedar is a modern facade panel inspired by natural cedar wood, giving the building a warm and elegant character. Its expressive three-dimensional profile creates depth and a subtle interplay of light and shadow, emphasising the modern architecture. The light Cedar shade blends perfectly with render, glass, concrete and anthracite accessories, creating a timeless and refined facade

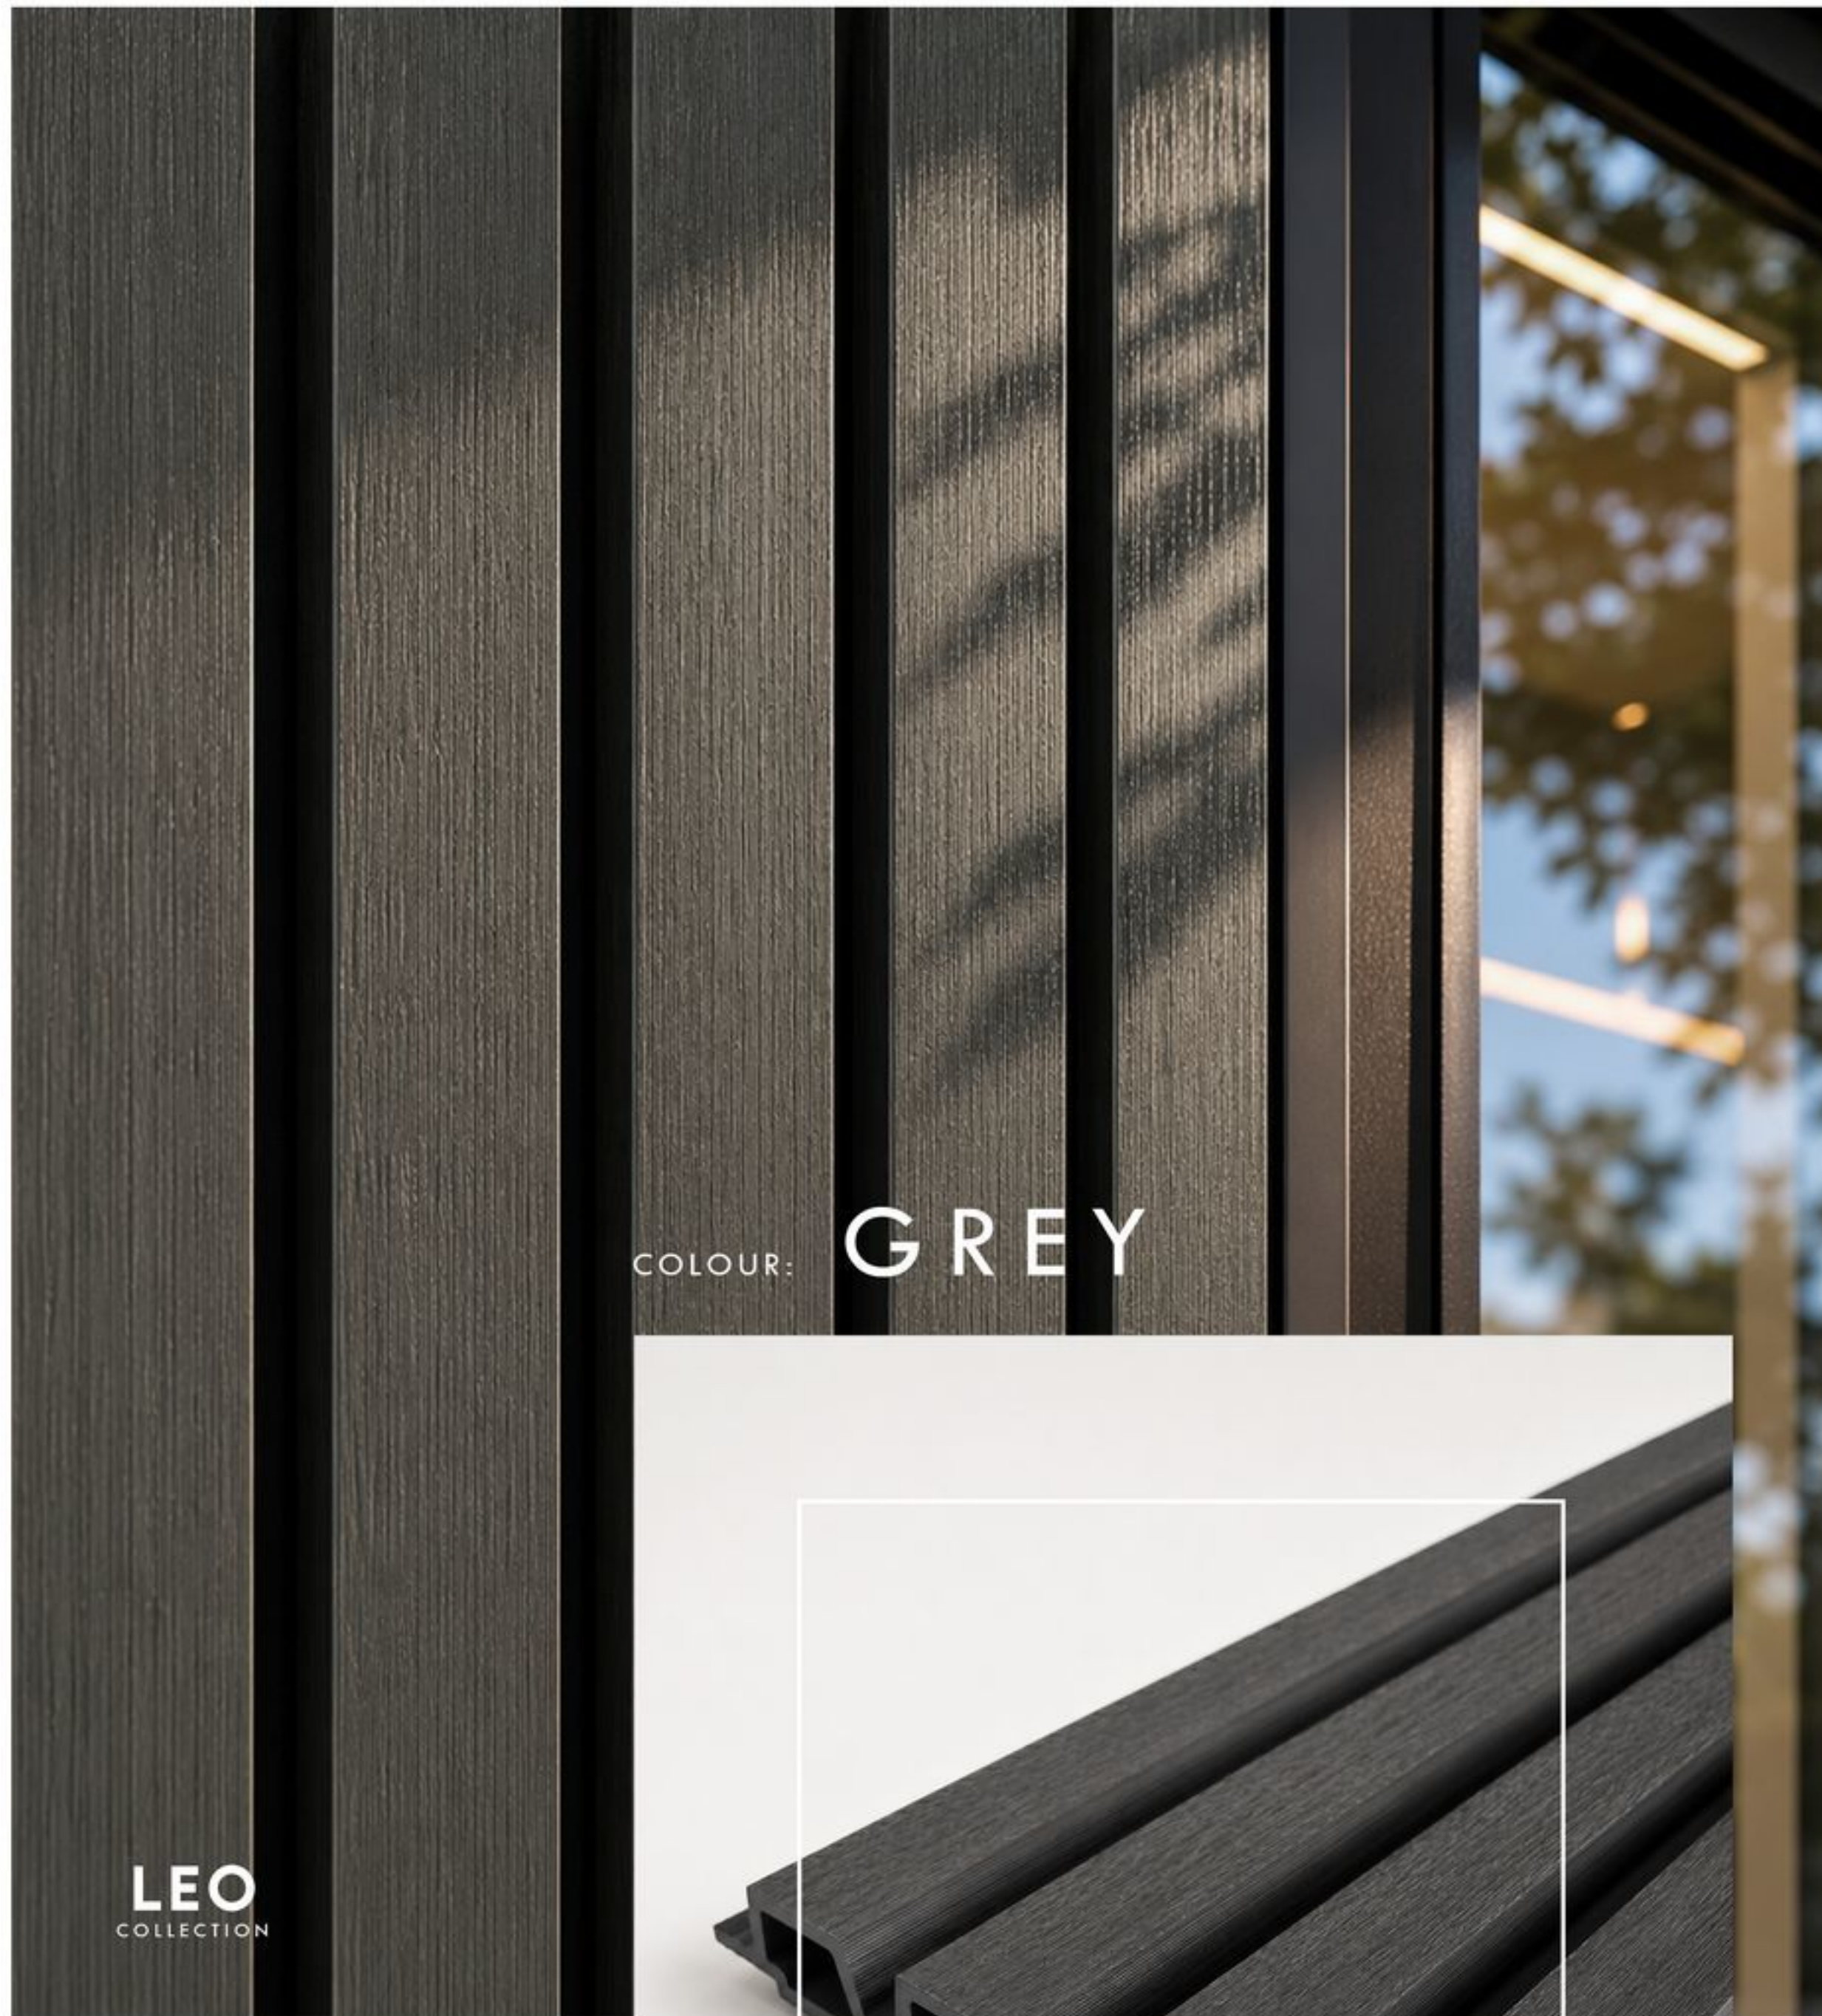

Leo Teak is an elegant facade panel inspired by noble teak wood, valued for its deep colour and timeless character. An additional feature is the groove in a colour similar to the panel surface, providing a coherent and natural appearance across the whole facade. As a result, the facade looks harmonious and elegant, faithfully reflecting the aesthetics of natural wood while maintaining the durability and weather resistance of modern facade materials.

LEO Grey is a modern interpretation of natural wood structure in an elegant grey shade. The subdued colour works perfectly with architectural concrete, stone and anthracite finishing elements, giving the building a refined and timeless character. A distinctive feature of the collection is the groove in the same colour as the panel surface, so the facade forms a coherent, harmonious plane without strong contrasts.

CARLOS

COLLECTION

Carlos is a collection of modern facade panels with a wide, flat profile, created for minimalist and elegant architecture. Thanks to a specially designed edge, once the panels are installed side by side, the joint is practically invisible, while the joining area is subtly rounded. This form creates a uniform, harmonious surface with a modern character. The delicate wood texture gives the facade a natural appearance while maintaining high durability and resistance to weather conditions.

SUBTLE RHYTHM

Four shades of the Carlos collection.

cedar

teak

walnut

grey

	coverage area	0,432 m ²
	weight per m ²	11,8 kg/m ²

Carlos Cedar stands out with a warm, natural cedar wood shade that gives the facade a cosy and elegant character. The delicate colour diversity and subtle wood texture make the panels look exceptionally natural. The wide, flat profile creates a modern effect of large, harmonious surfaces. Carlos Cedar blends perfectly with light render and architectural concrete.

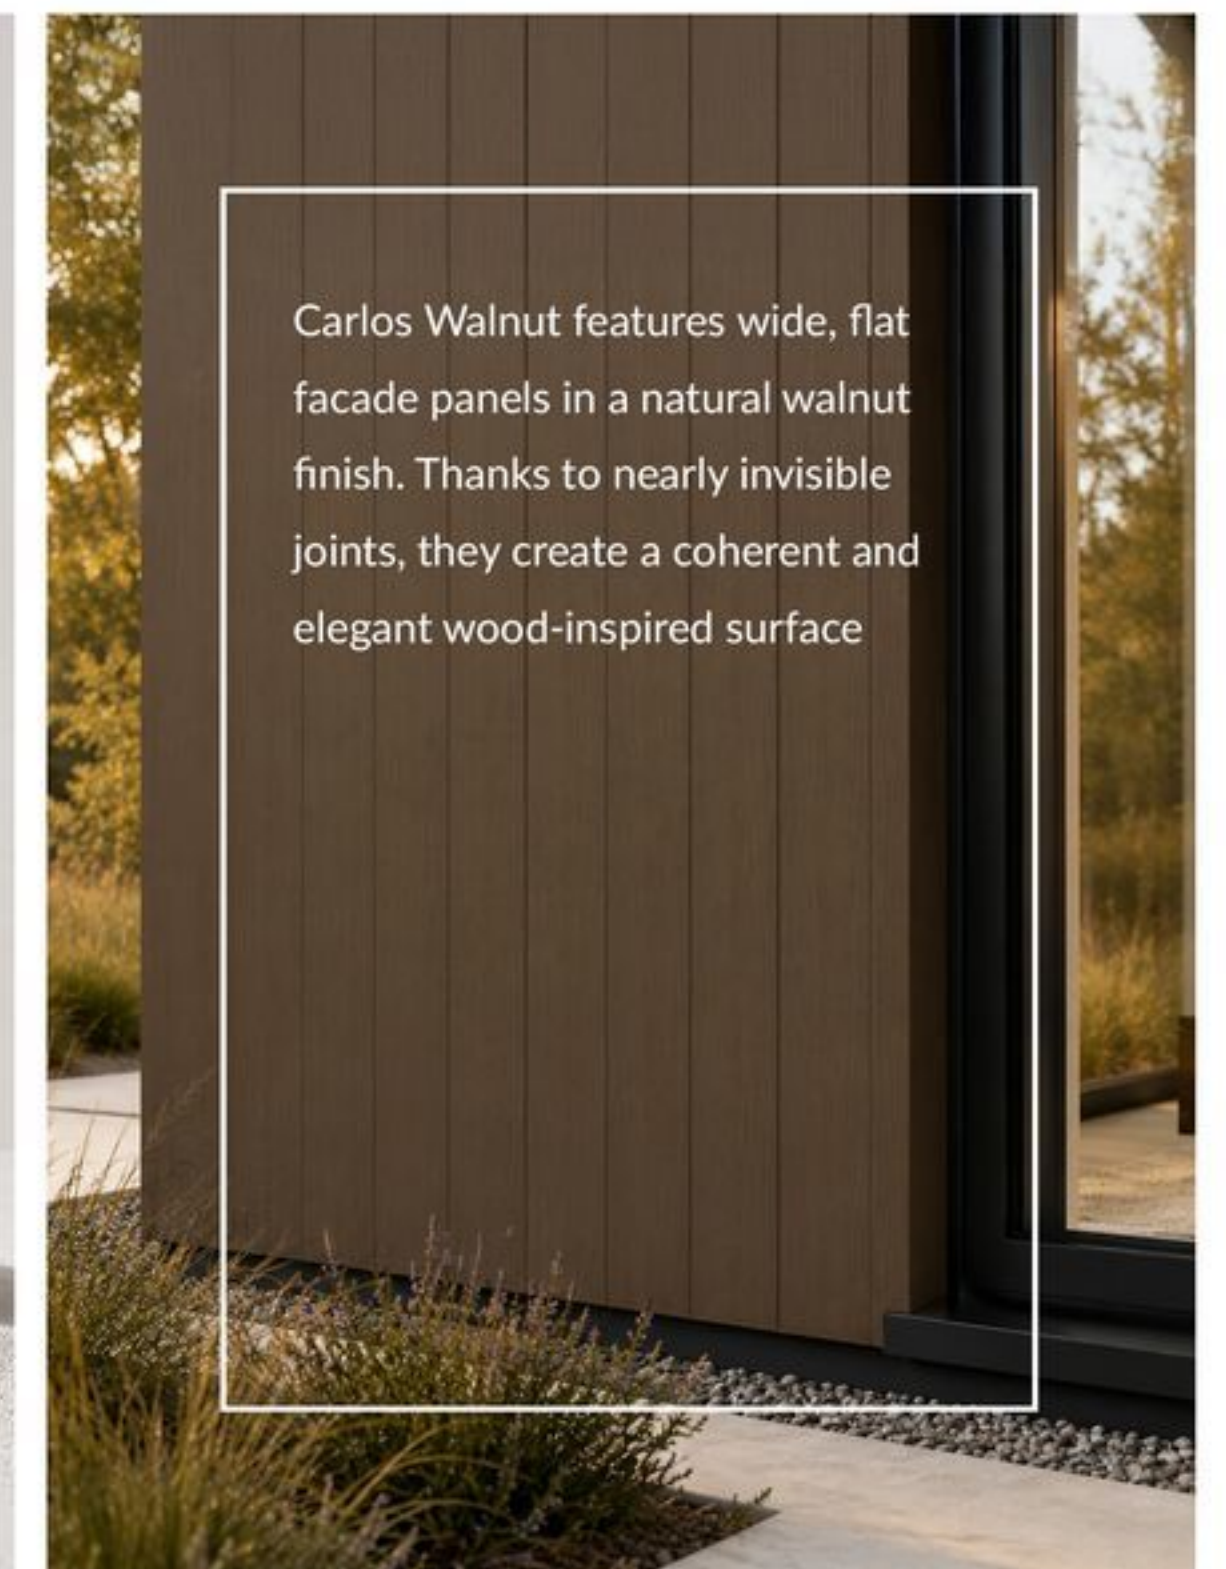

CARLOS
COLLECTION

COLOUR: WALNUT

Carlos Walnut features wide, flat facade panels in a natural walnut finish. Thanks to nearly invisible joints, they create a coherent and elegant wood-inspired surface

Carlos Grey facade panels in an elegant, understated shade of grey give buildings a modern, architectural character. The delicate wood-inspired texture and wide, flat profile make the facade look minimalist, creating a harmonious and refined form.

EVERYTHING YOU NEED FOR THE PERFECT FACADE

IN ONE PLACE

Lamelio OUTDOOR is more than just facade panels. It is a complete system of carefully designed components that work together to create a durable and aesthetically refined facade. Every detail - from finishing trims and corners to battens and installation accessories - has been designed to ensure the system works smoothly and with precision. This means that during installation you can focus on creating exceptional spaces, while we take care of every detail of the system.
